## Full Stack Developer

Passionate Full stack Developer specializing in Android and web development, actively pursuing Full Time Job opportunities. Equally proficient in frontend and backend technologies, with a focus on crafting comprehensive solutions. Eager to apply diverse skills and contribute to real-world projects.

## PROFILE SUMMARY

- Accomplished Fullstack Developer innovating solutions for Android and web.
- Proficient in DSA across C/C++, Java, Python, and JavaScript, with extensive experience.
- Committed to continuous learning and mastering new technologies.
- Expert in frontend and backend, ensuring seamless user experiences.
- Actively contributing to Open Source, fostering collaboration and community engagement.
- Seeking internship to apply skills in real-world projects, contributing impactful solutions.

## EDUCATION

<b>Bachelor of Artificial Intelligence &amp; Machine Learning</b> , Sanjay Ghodawat University, kop	2023-Present
<b>Diploma in Computer Engineering</b> , Dr. D. Y. Patil Polytechnic, kop.	2021-2023
<b>HSC [12th]</b> , Private High School & Jr. College, kop.	2019-2021
<b>SSC [10th]</b> , Private High School, kop.	2019

## TECHNICAL SKILLS

- Programming Languages :  
C, C++, Java, Python, html, css, Javascript, Reactjs, Nextjs, MySQL, php, Nodejs, Moongo.
- Other :  
Firebase, Git, AWS, Canva, Figma,Photoshop, Postman, VS Studio.

## WORK EXPERIENCE

- Anthaathi** | As a Intern. Aug 2022 –Oct 2022  
As a web development intern at Anthaathi Company, I gained hands-on experience with React, honing my skills in front-end development and with the Firebase connectivity.

## PROJECTS

- FUNDING FLEDGE** | html, css, Javascript, php, MySQL.  
Our final year diploma project, Funding Fledge, revolutionizes entrepreneurship by facilitating direct communication between entrepreneurs and investors via our website. We integrated chat box functionalities to streamline interactions and foster meaningful connections.
- MENTOR HUB** | React+vite, Javascript, Sass, Firebase.  
During a hackathon, we developed Mentor Hub, addressing the challenge of providing real-time guidance to students. Our React+Vite application enables direct communication between students and mentors, fostering seamless guidance through in-app chat functionalities.
- RENTAL APP** | Android Studio, Java, Firebase.  
We crafted a real-time rental app using Android Studio, enabling users to upload products for rent and facilitating seamless communication between owners, renters, and administrators. This project served as a practice exercise to hone our development skills and explore real-world application scenarios.
- CAMPUS CONNECT** | Nextjs, Nodejs, Python, Cloud. [ Open Source ]  
We've created a one-stop platform for our college, integrating attendance, timetable, student, fee, and exam management into both a website and Android app. Simplifying tasks for students and future users, we're eager to present it to our college's technical team and deploy it.

## OTHER

As the Student of the AIML department,I bridge tech and creativity, exploring cutting-edge research while nurturing a passion for football. Proficient in Marathi, Hindi, English. Coding isn't just a skill but a fervent passion driving my journey.
